

Vegetarian Chili

2 ½ cups V8 or other tomato juice

1 can vegetarian baked beans (or regular pork in beans)

1 can great northern white beans

1 can black beans

Chili powder to taste.

Rinse black and great northern beans. Add everything together and heat up. Adjust seasoning to taste. Ready to serve when boiling hot. Any bean can be used in place of the black or great northern. I don't use kidney beans kids don't seem to eat them as well as the other beans. We serve this with a fruit and vegetable and crackers.
